HILTON TRINIDAD POOL AND DECK RENOVATIONS TO BE COMPLETED IN DECEMBER 2017

November 25, 2017:- In the last quarter of fiscal 2017, the Ministry of Trade and Industry through Evolving Technologies and Enterprise Development Company Limited (e Teck) embarked on a project to re-design and upgrade the Pool and Pool Deck at the Hilton Trinidad and Conference Centre. This project forms part of e Teck's continued hotel renovation works which also facilitated the refurbishment of guest rooms and suites in 2005. e Teck at present, manages the lease operatorship of the Trinidad Hilton and the Magdalena Grand and Beach Golf Resort, Tobago on behalf of the Government of Trinidad and Tobago.

Both the Hilton Pool and Pool Deck are over 50 years old and require major remedial works and redesign to meet international safety standards. On-going works have transformed and organized the 15,250 sq. ft. pool deck space to satisfy the needs of the hotel's guests. Renovations when concluded will provide clients with access to new washroom facilities and three cabanas. An audio-system, a refurbished rock wall feature together with garden and landscaped lighting will also be installed. **It is expected that the new Pool and Pool Deck will be handed over to Hilton's Management by December 2017.**

e Teck through its upgrade works, continues to support the evolution of the landmark Hilton Trinidad to meet international standards and maintain its reputation as a premium Meeting and Conference Centre. The enterprise remains committed to ensuring the hotel is competitive in the Regional Tourism Industry and positioned as the pre-eminent choice of business and leisure travelers locally.
